

ADULT REDEPLOY
ILLINOIS

SFY24 IMPACT REPORT

In SFY24, **Adult Redeploy Illinois (ARI)** invested in building our network's capacity to meet the needs of individuals and communities. Below are highlights of our impact, with further details at: <https://icjia.illinois.gov/adultredeploy/>.

BY THE NUMBERS

\$10.9M in funding awarded to local jurisdictions

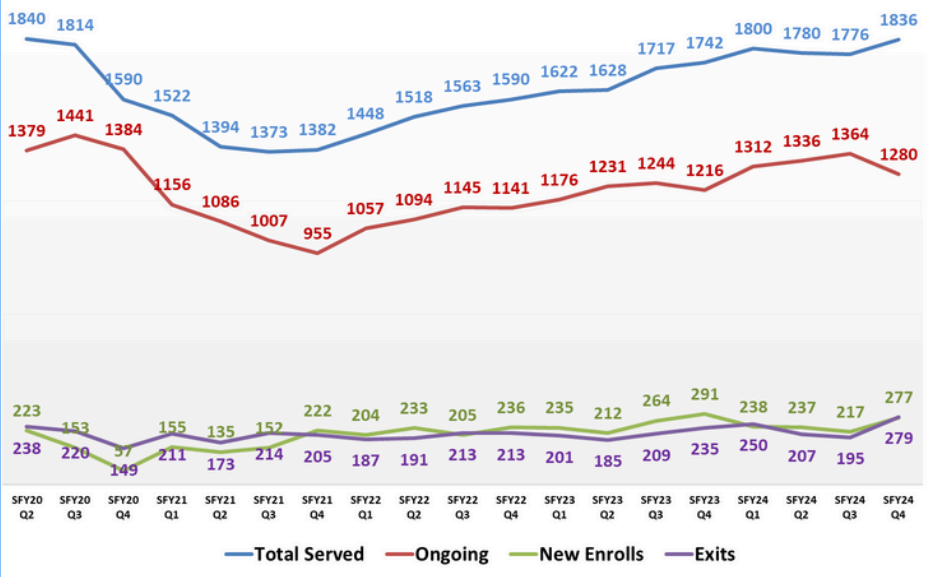

27 sites across **45** counties (adding Champaign)

2,521 individuals supervised and served in their communities

\$75M in state incarceration costs avoided

INCREASED SERVICES

Service levels in ARI-funded programs in SFY24 exceeded **1,800 individuals per quarter** for the first time in years. Coordinated with probation supervision and guided by case plans, client services include cognitive behavioral therapy, substance use and mental health disorder treatment, transportation and housing assistance.

EQUITY-FOCUSED WORK

In collaboration with Developing Capacity Coaching (DCC), ARI sites participated in **data-informed equity communities of practice** to explore historical and current data, identify racial and other disparities in access to prison diversion programs, and develop plans for change. DCC also conducted a modified **participatory action research** project, interviewing local stakeholders about practices that may limit access to program benefits.

House Bill 4409, updating the section of the Crime Reduction Act concerning ARI to clarify granting language, add two **Vital Voices** (program alum) to the Oversight Board, and incorporate person-centered language, was advanced by the Illinois Criminal Justice Information Authority and passed into law.

TTAD: INVESTING IN HUMAN CAPITAL

In SFY24, ARI established the **Training, Technical Assistance, and Development (TTAD) program** to expand site capacity and effectiveness in delivering evidence-informed local supervision and services to justice-involved clients in lieu of incarceration and to implement the mission, vision, and values of ARI.

ARI awarded grants to Developing Capacity Coaching (DCC) and TASC's Center for Health and Justice (CHJ) to collaboratively develop a comprehensive, responsive, and effective TTAD program beginning with interactive planning sessions at the **2024 All-Sites Summit**.

DCC and CHJ conducted a landscape scan and gap analysis of sites' TTAD needs and developed a curriculum for implementation in SFY25.

ARI Program Director Mary Ann Dyar (second from L) with TTAD providers Dr. Jonathan Ross, CHJ; and Dr. Annice Fisher, Chasity Wells-Armstrong, Terry Stokes, and Karis Middleton, DCC.

“Through this program I have learned to be happy with where I'm at in life and appreciate all the positives coming from trying hard. I've never tried harder at something in my life. My family have expressed that they can see how hard I've been trying as well. The feeling I get from that has reinstalled in myself that **I'm here to thrive in life, not just here to get by in life.**

- ARI Vital Voice
